ROOTS & FRUITS OF

2- DAY FOUNDATION
WORKSHOP

NLP is a completely unique synthesis of cybernetics, neurology and linguistics, that offers you practical methods for rapid personal improvement.

Is the Art & Science of how we use our brain to communicate with ourselves and other people. Is the study of Subjective Experience.

A 2-day workshop with practical tools and techniques you will use to become an excellent communicator, flexible and resourceful.

We will discuss numerous intricate nuances that are seldom learned and/or practiced. I will demonstrate many of the original patterns and fit them seamlessly together with the more complex skill sets that have been developed over the years. You will participate in exercises designed to give you direct experience of many intricate and subtle skills that often are "the difference that makes the difference". Magic at its finest.

The missing pieces from the original NLP research will be revealed. Your questions will be answered, and the incredible sense of wonder that was yours, when NLP was fresh in your minds, will be refreshed or renewed.

We will discuss and practice how to turn skill to art. This is the true genius of the NLP professional.
